Abstract: In Today Era the world population is eight billion plus. More than 55% are women who are facing injustice situation from born to death. Whereas In many advanced countries woman's health, education, sports and financial power have depicted that women are still minor to men. Women live in rural areas, are answerable for most of the domestic work without financial effect analysis. As Time goes on there are quickly changes in technology which results into globally change with differential effects on gender. This paper focuses on increasing gender issues in the society. Women Empowerment is center of attention on empowering each and every woman in the country. So that it make them independent in all fields in the society and to be aware on the rights. It also emphasis to make them provide physical security. Also this paper describing the schemes available for Women Empowerment in our country.

Keywords: Women empowerment, ECS, WEC, SHG, NGO, ICT tool.

I. Introduction

Life is so precious for everyone whether it is Men or a Woman. But sometimes the people thought that there is only a person, who decided it what is better for Women. They thought that no rules for men but the men to make rules for women. what is the reason behind it? Social differences of men and women! They thought that men is more powerful and sharp than women. They thought women confined to private domain of the family are public domain is dominated by men. But, no this is not really true, Because at the present time the women are more sharp as compare to men. Take the case of dignity of women the long struggles by women all over the world created sensitivity towards gender discrimination. In every sector women beat the man's target even rise at the top level with their hard work. With their hardwork and determination they achieve higher levels such as Doctor, Engineer, Architecture, Social worker, Entrepreneur, Politician, Reporter etc. But in some states or some cities the chance of injustice against women is too fast. Violence against women in many forms, physical, sexual, psychological and economic. These include violence carried out by individuals and states. Some of the forms of violence created by single are rape, domestic violence, sexual harassment, intimidating use of contraceptives, female infanticide, prenatal sex selection, obstetric violence and mob violence. These victims were killed, beaten and even killed after being raped. Many women reach the point where they conclude to commit suicide because of extreme domestic violence.

Inequalities between men and women and intolerance against women have also been age-old affairs all over the world. Thus, women's quest for parity with man is a universal sensation. What exists for men is importune by women? They have demanded parity with men in material of education, employment, convention, marriage, politics as well as latterly in the field of religion also to deliver as cleric. The position and stature of women all over the world has arise especially in the 20th century. We find that it dated very little in 18th and 19th decades in India and elsewhere when they were conduct like 'objects' that can be acquired and sold. For a year women in India advised within the four walls of their household. Their addiction on men folk was total. A long work going back over a century has import women the premises rights, voting rights, an identity in civil rights before the law in issues of marriage and employment. In dependence to the above rights, in India, the customs of purdha (veil system), female infinitudes, child marriage, sati system, dowry system and the state of stable widowhood were either totally erased or testing to an significant extent after independence through senatorial measures. Two Acts have also been parliamentary to deliver women in India. These are: conservation of Women from private attack Act, 2005 and the Compulsory Registration of Marriage Act, 2006. The private attack Act recognizes that crime be harassment as well as mental. Anything that makes a woman feel lesser and takes away her self-respect is crime. Compulsory Registration of Marriage Act can be beneficial in preventing the crime of insti_tution of marriage and burden social authority specially in relation to women. It would help the countless women in the country who get discarded by their husbands and have no trick of proving their married status. It would also beneficial to identify child marriages, polyandry and polygamy, prepare women to seek care and custody of their children and widows can claim legacy rights. The Act is relevant on all women regardless of caste, creed or religion. It would truly empower Indian women to flourish their rights. Women

should now there elementary and social rights which they get from their birth. There should be justice, respect and value towards

Women have sum independences of their personal choice in decisions and lifestyle in the home and also outside from house like at their work. They should make their agreement, by their own choice. They should have a high social value in society. They have feminism in society and other social works. They should not be disfavor while giving any type of education. They should select their own budgetary and monetary choices by their own.

There should not be any intolerance between woman and man while giving appointment as well as employment. They should have safe and guarded Working location with proper confidentiality. There is no revoke the fact that women in India have made a huge progress in around seven decades of Independence, but they static have to struggle against many handicaps and social affliction in the male-command society.

Many destructive and masculine forces still overrule in the modern Indian society that refuse the forward march of its women folk. It is cynic that a country, which has latterly extolled the status of the first Asian country to accomplish its Mars aim in the introductory attempt, is stand at the 29th revolting among 146 countries crossed the map on the footing of Gender Injustice Indicant.

There dated amelioration in the post of women, but their true empowerment is closed awaited. Swami Vivekananda, one of the greatest sons of India, instanced that, “ There is no incidental for the interest of the earth unless the situation of women is enhanced, It is not possible for a bird to fly on only one wing.

” Therefore, the involvement of “Women Empowerment’ as one of the prime objectives in the eight Millennium Development Objectives underscores the purpose of this fact. Thus, in order to attain the status of a refined country, India commitment to reconstruct its colossal women effort into an impressive human resource and this is available only over the empowerment of women.

Empowering women to engage whole in economic life across all category is essential to building stronger economies, accomplish universal allow objectives for advancement and sustainability, as well as develop the property of life for women, men, blood, as well as commonality.

II. Literature Review

Sharifa Rania Mahmud et. al , In this paper we conclude that the Technology will help in every Sector for the urban gentlewomen and the pastoral gentlewomen in everyday life in full on the earth. With the improvement of technology, women prefer to use mobile appliance for the purpose of their security. That’s why many mobile applications have been introduced. It also includes urgent call system, which will be active by the victim women when they are in danger. If a women going to faces any bad situation our ECS system will help her to inform her close one and the police with her location tracing. The application also contains different health tips for women. There may be some times, when a woman feels insecure to go somewhere. She may feel some threats. Therefore, near future we want to introduce continuous location tracking feature in our application so that users can provide her current location of each and every moment to someone whose information already stored in the application by the user. It will help women in every aspect of her daily life very much and the application that is actuality execute has an important place to support a women. The user of our application Women Empowerment is specially women. Different existing applications are specific only for emergency call when they may be at risk, some applications contains complete resources for casualty of private violence, and a way to get help when you need it. But our application will provide instruction about private attack prevention laws, health tips for women and urgent call for women seeking help from street violence in a single system.

A. Priyadharshini et. al , In every village an eminent Women empowerment cell (WEC) need to be deployed. That cell needs to guard of all the women in that particular village. The cell needs to conduct awareness program in all aspects. All the gentlewomen in the village need to be counseled to find the problems they are facing in their life. Situated on the problems, the WEC needs to give the solution. Women suicide ratio can be decreased by contribute counseling to those who are mentally weak by a psychologist. Along with the details of autonomous Help club we have also collected the questionnaire that has been used to connection the autonomous Help clubs. Nearly, sixteen thousand Self Help Group are running under Women Empowerment Cell of a single district. For customer tour to a village named Kootathupatty that has been posted in the same Salem district and surveyed the autonomous Help clubs in that village. As, we know some representative of those clubs it is easy for us to complete the questionnaire. There are five groups running successfully in that village, at the time of our visit it is able to visit only three groups namely Lotus, Lily Women and Rose Women. From the three clubs we completed our questionnaire and the assessment report. To motivate the best autonomic Help club government of Tamil Nadu has announced Manimegalai Award at state level, state matched as well as block level from the year 2006-07. In this award state matched tops SHG dated awarded with three lakh cash award, district matched tops SHG dated awarded with twenty five thousand cash award and block matched tops

SHG has been awarded with certificate. Women Empowerment focuses on empowering each and every woman in the country to create them separately in every conditions in the society, expected attentive on the rights and to create them equip about physical security.

This paper focuses on describing the issues that women are facing in their daily life, schemes available for Women Empowerment in India and autonomic Help Club which is successfully running in the state of Tamil Nadu, suggestions on autonomic Help club for future enhancement and a anamnesis of Women Empowerment Cell.

R. Amudha et. al , Women empower is to aware the term of insurance. Insurance is too important for every person. Microfinance, as well as microcredit, is a commercial duty so that tenders credit, retaining as well as provision to speculators and also minni work partners, who don't get approach to conventional authority of central, like as store either bankers. The objective of micro financing is to sustain respective including salary devote in themselves either their trade. Insurance products so that rendition analysis to small salary households. A micro insurance idea to give security to respective who have small retaining sewn and is sewn specially for minor valued assets and advantage for sickness, distress or expire. The micro insurance institutions may encourage the people from the age group of 20-30 years to join in the micro insurance program. Micro insurance which is unpopular among uneducated people can be more publicized through NGOs, SHG, LIC agents, Government which results impact a whole lot of change in the micro-insurance category or in a women empowerment.

Zebunnessa Laizuet. al , In previously papery I conclude that the pastoral women in Bangladesh have finite connection to belonging as well as popular spheres due to socio-cultural restrictions. This paper discussed the matter of gentlewomen agreement using ICT tools, and a model was developed to measure cognitive changes in women's intellectual space leading to empowerment. Although the results differed between the two villages, it can be consummate that if women's engagement in ICT is active and in-depth in terms of learning including learning, again women could become more privilege. Further, underdevelopment perhaps reduced usal pastoral society in Dhaka beyond gentlewomen achieve proficiency as well as literacy. The objective in this regard the cardboard can do classify component effectuate women's empowerment, asset the energy of ICT for women's empowerment, equipment a exemplary for mapping empowerment, as well as classify either co-active addition whereas interference action.

Susana Munoz-Hernandez et. al , In previous papery I conclude that it describes a prosperous PhD program that has found some good ways to solve this muddle. The program is located in Sudan. It is usal the field of information technology but could be replica in other studies at any other place with same issues. In Sudanese universities, women outnumber men. In implementing, information and strength technology specially, the sum of gentlewomen over count gentlemen in all of the university divisons of training secretary as well as instructions (property instructor degrees). In this program ICT outdated hired for the agreement of gentlewomen usal academia. These way female lecturers do not have to spend years in the smaller university division unjustifiably. ICT outdated used to benefit from the worldwide human and technological resources as well as valuable experiences. Excellency scholarships can be granted to women from the region to join the program.

III. Recommendation & Conclusion

In all rural area an eminent Women empowerment cell (WEC) need to be located. That cell needs to guard of gross the women in particular village and infected area. We conclude that the Technology can help in every Sector for the urban women and pastoral women in everyday life in all over the earth. With the development of technology, women prefer to use stimulating functions for the purpose of their security. In this paper we conclude that the pastoral women in Bangladesh have finite connection to belongings and popular spheres due to socio-cultural restrictions. In addition, we want to say that it describes a prosperous PhD program that has found some good ways to solve this muddle.
